The tongue drum, also known as a tank drum or hank drum, is an idiophone instrument that consists of a series of metal tongues that are tuned to specific pitches. When struck with mallets or hands, the tongues produce melodious sounds that are reminiscent of a steel drum or a xylophone.

The handpan, on the other hand, is a relatively modern instrument that was inspired by the steelpan drums of Trinidad and Tobago. It consists of two steel hemispheres that are carefully crafted and tuned to create a harmonic and resonant sound. The handpan is played by tapping the steel surfaces with the hands or fingers, producing captivating tones that evoke a sense of tranquility and introspection.

In musical science, a unique Native American style of singing can be distinguished. It is characterized by rhythmic breathing, a tense voice, and syllabic sounds being more important than lyrics. These technical features helped the shaman achieve a trance state. Although the tongue drum is a modern musical instrument, is perfectly suitable for any tribal song.
