

Ben Moss And Tony Angiola: A Collaboration Shaping the Future of Technology

In the fast-paced world of technology, collaborations often lead to groundbreaking innovations. One such collaboration that has been making waves in the industry is between Ben Moss and Tony Angiola. Combining their expertise and passion for pushing the boundaries of what is possible, Moss and Angiola have been forming a dynamic duo that is shaping the future of technology as we know it.

Ben Moss, an accomplished software engineer, has been at the forefront of numerous technological advancements over the years. His work has led to the development of cutting-edge applications and systems that have revolutionized industries and improved user experiences. With a deep understanding of programming languages and a unique ability to solve complex problems, Moss brings a wealth of knowledge and expertise to the table.

Tony Angiola, on the other hand, is an exceptional UI/UX designer with a keen eye for detail. His creative vision and ability to design user-friendly interfaces have made him highly sought after in the industry. Angiola's work not only focuses on aesthetics but also on usability and accessibility, ensuring that the end users have a seamless and enjoyable experience. His innovative designs bring life to Moss's technical innovations, creating truly remarkable products.

Together, Moss and Angiola have collaborated on a wide range of projects, each one pushing the boundaries further. From developing intuitive mobile applications to creating immersive virtual reality experiences, their combined expertise has resulted in groundbreaking solutions that are changing the way we interact with technology.

One of their notable collaborations is in the field of artificial intelligence. Moss's expertise in machine learning algorithms combined with Angiola's intuitive designs have paved the way for intelligent virtual assistants that can understand and respond to human interactions with remarkable accuracy. These virtual assistants have found applications in various industries, from customer support to healthcare, greatly improving efficiency and user satisfaction.

In addition to their technical innovations, Moss and Angiola are also passionate about inspiring the next generation of tech enthusiasts. They actively participate in mentorship programs, sharing their knowledge and experiences with aspiring engineers and designers. Through workshops and seminars, they aim to nurture young talents and shape the future of technology.

As their collaboration continues to evolve, Moss and Angiola have set their sights on new horizons. Their ambition is to tackle the challenges of emerging technologies such as quantum computing, blockchain, and augmented reality. By combining their respective expertise, they aim to unlock the potential of these technologies and create groundbreaking solutions that will shape the future.

, the collaboration between Ben Moss and Tony Angiola is a force to be reckoned with in the world of technology. Their combined expertise, passion, and innovative thinking have resulted in groundbreaking solutions that are shaping the future of the industry. As they continue to push boundaries and explore new frontiers, we can expect even more remarkable innovations from this dynamic duo.

This book you are about to read was written for several reasons, and contains various information and events, but the glue that bonds it all together was the

1964 Socorro UFO landing case in Socorro, New Mexico in April of 1964.

Lonnie Zamora, a respected police officer in Socorro, New Mexico, witnessed a strange object pass overhead while chasing a speeder, on April 24th, 1964. Upon abandoning the chase, Lonnie followed the direction he saw the object going, into the desert, to see if there was anyone in trouble, perhaps a crashing plane.

Instead, what he saw, after climbing a difficult rise, would change his life forever, and not in the best way.

We will later go into the details of this strange and life changing encounter.

This book is also about the long journey that put Tony Angiola and I on the road to Socorro. It's about meeting and becoming close friends with Ray Stanford, NICAPS original UFO Investigator dispatched to Socorro just days after the incident, who was welcomed on the site by Doctor J. Allen Hynek himself in 1964.

I will touch on the current state of Ufology in this year of 2019, the good and the bad, and how a Mufon Symposium in Cherry Hill New Jersey in 2014 started Tony and I on the path to many new adventures, including:

Meeting Paul Villadolid, a producer of the Mufon backed Hangar 1 in Los Angeles, which lead to us both of becoming a part of the second season of this History Channel's very popular UFO TV show, based largely on Mufon case files. Hearing James Fox discuss his new movie he was working on, then titled "701", and showing a segment on the Socorro Incident, that included Ray, which triggered a memory in me about a related video and story I has seen on the tv show "Sightings" in the 1990's.

Subsequently, at this very conference, after speaking with James, I promised him I would find what I seen on TV 20 or so years earlier, which later became a detailed investigation, now a chapter in this book entitled, "The Search for the Lost Socorro Footage".

After publishing the first article about this search in the Mufon Journal, Mufon's Director was contacted by Ray Stanford, who was still going strong in his late 70's, and who also lived within driving distance of my location in Virginia. Mufon

then generously put us in touch with Ray, who had reached out to him to ask who the heck we were, leading to a now 5-year relationship and 100's of hours of UFO discussions, mentoring, and access to his wealth of knowledge about the UFO subject, his personal experiences, and especially his investigation of the Socorro incident in 1964.

Of course, first we had to pass Ray's vigorous background check in order to make sure we were who we say we were. With a plethora of embellished and made-up resume's with regards to individuals in the Ufology mix, Ray was just doing his due diligence to make sure we were honest and truly searching for the truth of the UFO enigma.

Now, at the end of 2019, we have recorded here for the reader our 5-year investigative deep dive into the Socorro UFO landing case, including new information and witnesses, our 2 onsite visits, and our interviews with those who were in Socorro at the time, or were friends or family with Lonnie Zamora, the respected Police officer who was the primary witness to this event.

We will also rely on Ray's excellent investigation of this case, chronicled in his seminal book "Socorro Saucer in a Pentagon Pantry".
