The Soviet forces began their encirclement by launching a three-pronged attack. The northern and southern pincers closed in on the German Army, while the central front put pressure on the center. The sheer size and speed of the Soviet offensive caught the Germans off guard, and within days, they found themselves encircled in a pocket known as the Minsk Salient.

The Minsk Salient was a cauldron of death and desperation. The trapped German Army faced overwhelming odds as they were surrounded by the Soviet forces on all sides. Cut off from supplies and reinforcements, their situation seemed hopeless. The battle that followed would be a grueling test of endurance, bravery, and desperation.

Inside the Minsk Salient, the German Army fought valiantly to break out. They launched multiple counterattacks, desperately trying to punch a hole in the Soviet lines and escape. The intensity of the fighting was relentless, with both sides unleashing every weapon and tactic at their disposal.

However, the Soviet forces were determined not to let the German Army slip away. They counterattacked the counterattacks, launching powerful offensives to crush any hopes of a breakout. The Soviets had learned from previous battles and made sure to envelop and neutralize any German resistance.

In the end, the German Army's efforts were in vain. Despite their tenacity and skill, they were unable to break free from the encirclement. The Soviet forces tightened their grip, closing off any escape routes and tightening the noose around the trapped Germans.

Realizing the enormity of their situation, the German Army faced a grim choice. Surrender meant certain captivity, while attempting a breakout meant risking annihilation. Nevertheless, they chose to fight on, opting for one last desperate push towards freedom.

The breakout attempt became a frantic struggle, with the Germans throwing everything they had into it. Tanks roared across the battlefield, infantry charged with bayonets fixed, and artillery barrages pounded the Soviet lines. It was a battle of attrition, with both sides suffering heavy losses.

But the Soviet forces were prepared. They had orchestrated the encirclement meticulously, and they knew that time was on their side. As the German Army poured its last reserves into the breakout, their exhaustion and dwindling supplies became apparent.

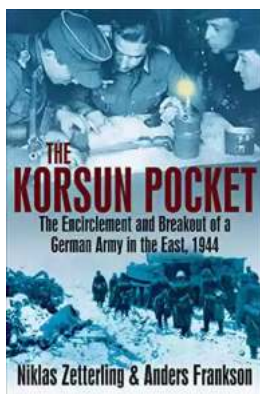

Eventually, the breakout attempt faltered. The Soviet lines held, and the encirclement remained intact. The German Army's hopes of escape were shattered, and they had no choice but to surrender or face complete annihilation.

The encirclement and breakout of the German Army in the East in 1944 was a decisive battle that shifted the momentum of World War II. It showcased the strategic prowess of the Soviet Union, outmaneuvering and overpowering the German forces. It also highlighted the desperation and determination of the German Army, fighting tooth and nail to the bitter end.

Ultimately, the encirclement and breakout marked a turning point in the war. It demonstrated the vulnerability of the German Army and eroded the morale of their troops. From that moment on, the Soviet Union gained the upper hand, relentlessly pushing the Germans back until the final defeat in Berlin.

History is filled with moments that shape the course of events. The encirclement and breakout of the German Army in the East in 1944 was one such moment. It was a battle that tested the limits of human endurance and showcased the full spectrum of human emotions - courage, desperation, and sacrifice.

Remembering the heroes who fought in this epic battle is a testament to the resilience of the human spirit in the face of adversity.

“Compelling prose, abundant tactical detail, lots of maps . . . If you’re hungry for a good WWII East Front battle book, look no further.” —Russ Lockwood, Magweb.com

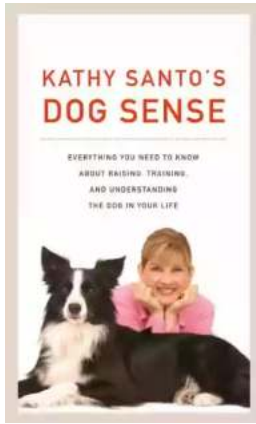

In January 1944, around the village of Korsun (near the larger town of Cherkassy on the Dneiper), a disaster happened. Six divisions of Germany's Army Group South became surrounded after sudden attacks by the 1st and 2nd Ukrainian Fronts. The Germans' greatest fear was the prospect of another Stalingrad, the catastrophe that had occurred precisely one year before.

Due to both weather and ferocious resistance, the German drive to rescue their trapped divisions stalled. It soon became apparent that only one option remained for the beleaguered defenders: breakout. Without consulting Hitler, on the night of February 16 Erich von Manstein ordered the breakout to begin. Led by the strongest formation within the pocket, SS Wiking, the trapped forces surged out and soon rejoined the surrounding panzer divisions who had been fully engaged in weakening the ring. Stalin was left with little but an empty bag, as Army Group South—this time—had pulled off a rescue.

In *The Korsun Pocket*, Niklas Zetterling, a researcher at the Swedish Defense College since 1995, and Anders Frankson have provided a highly detailed and often breathtaking account of one of the most dramatic battles of World War II. From grand strategy to soldiers' voices on the ground, including expert statistical analysis, the action and the stakes of the battle at Korsun are made vividly clear.
