The Chinese economy is growing at an unprecedented speed, and one of the emerging trends is angel investment. It is an area with tremendous potential for

growth. Compared with the more mature markets in Western countries, however, angel investing in China is still at an early stage, due to a lack of incentives and insufficient policy support. By delving into existing literature on China's angel investment and conducting interviews with leading angel investors for China and abroad, Prof. Liu Manhong and Dr Wang Jiani — both scholars on and practitioners in the angel investment market — try to provide readers with a detailed picture of China's angel market: What is going on in the market? How should the government formulate relevant policies? And, perhaps more pertinently, what should investors know if they have invested in or are going to enter this market? This book will be very useful for scholars and researchers on China's angel market, as well as those 'angels' who would like to tap its full potential.
