How does it work?

The game revolves around contestants answering multiple-choice questions, and the goal is to accumulate as much prize money as possible. The levels of difficulty increase with each correct answer, making it more challenging as contestants progress through the show.

While human contestants compete physically on stage, the robot contestants reside in a virtual setting. These sophisticated robots possess remarkable artificial intelligence, capable of calculating answers faster than the human mind alone. They have access to databases covering a vast range of topics to ensure a fair and exciting competition.

Prize Money and Progression

Every correct answer brings contestants a step closer to the ultimate prize. The prize money increases exponentially with each question answered correctly. The game provides numerous lifelines to assist contestants, such as:

- **50/50:** This lifeline eliminates two incorrect options, increasing the chances of choosing the correct answer.
- **Phone a Friend:** Contestants can consult a friend over the phone, seeking their opinion on the correct answer.
- **Ask the Audience:** The studio audience votes on the correct answer, indicating the most likely option.

The ultimate goal is to reach the final question, where contestants have a choice: either walk away with their accumulated prize money or risk it all for a chance to become the champion of "Who Wants To Be Robot" and take home the grand prize.

Will humans overcome robots?

The rivalry between human and robot contestants has become a captivating aspect of the show. Viewers watch with anticipation as humans try to outsmart the machines, showcasing their knowledge and proving that human minds are still superior.

However, there have been instances where robots have astounded the world with their exceptional abilities. They showcase the power of artificial intelligence and its potential to revolutionize the way we perceive intelligence and knowledge.

Join the excitement!

"Who Wants To Be Robot" has gained immense popularity worldwide due to its innovative concept and thrilling gameplay. It has captivated audiences of all ages and backgrounds, bringing people together in the quest for knowledge and entertainment.

So, are you ready to step into the future and challenge the robots? Join us on "Who Wants To Be Robot" for electrifying showdowns, mind-bending questions,

and the chance to win big!

The off-world planet of Infinim, which promises a heavenly and eternal existence for its society of robots, is now taking applications. Although one of its applicants is older and not quite as quick as he used to be, does he have what it takes to be accepted? Figure out who he is before the story's end in this clever children's picture book.

Intended for ages 3 and up. Over 50 pages in all. Descriptions of my other popular children's books are included after the main feature (an additional 5 pages).
